

## **Global e-identity™ Renews and Expands Exclusive Licensing Deal with SDS to \$318 Million**

**Cupertino, CA — June 24, 2026** — Global e-identity™ Inc., a Service-Disabled Veteran-Owned Small Business (SDVOSB), today announced the renewal and expansion of its exclusive licensing agreement with Supplier Development Systems LLC (SDS). The new five-year deal, valued at \$318 million, extends SDS’s exclusive rights across Africa and adds Bahrain, Saudi Arabia, and the United Arab Emirates.

The agreement grants SDS immediate rights to market and deploy Global e-identity™’s patented mobile AI biometric platform for national ID, border control, immigration, financial inclusion, and secure digital identity programs. All sovereign and government contracts remain subject to Global e-identity™ approval. The deal includes strict performance milestones tied to deployment speed and revenue.

This expansion builds on the company’s ongoing Cooperative Research and Development Agreement (CRADA No. DHS\_25-TSA-014) with the U.S. Department of Homeland Security and TSA to modernize airport security, while accelerating commercial rollout abroad.

### **American Biometric Leadership Goes Global**

The platform, protected by five issued USPTO patents (10,135,822; 10,721,228; 11,277,405; 11,368,455; and patents pending), is the world’s first true mobile-based system combining AI facial recognition, 3D multi-modal vascular biometrics, dual liveness detection via real-time heartbeat and blood flow, quantum-resilient encryption, and self-sovereign identity — with all sensitive data stored on the user’s device using Full Post-Quantum Resilience Cryptography.

### **Leadership Comments**

“Renewing and expanding this \$318 million partnership validates our technology’s maturity and global demand. While we remain focused on advancing U.S. national security through our DHS-TSA CRADA, this agreement extends proven American innovation to key markets in Africa and the Gulf.” — Dr. Robert Adams, Chair, President & CEO, Global e-identity™ Inc.

“We’re proud to deepen our partnership at this scale. Adding the GCC countries to our African footprint positions us to deliver privacy-first, high-assurance biometrics to governments and enterprises undergoing rapid digital transformation.” — Jean Marie Thrower, CEO, Supplier Development Systems LLC (SDS)

### **Strategic Momentum**

The expanded license is expected to drive significant revenue in 2026–2027, complementing Global e-identity™’s core U.S. aviation security focus. The company continues to evaluate strategic initiatives, including a potential IPO in 2027.

### **About Global e·dentity™**

Global e·dentity™ Inc. is a Delaware-registered SDVOSB developing multi-factor biometric and digital identity solutions based on its proprietary patents. The company has offices in the United States and Singapore. [www.globaledentity.com](http://www.globaledentity.com)
